End of case

In this case, the Swedish Medicines Agency has checked the labelling, CPNP notification, information about limited UV filters in the safety report and proof of efficacy for the cosmetic product EVY Technology Sunscreen mousse SPF 50. According to the CPNP, Celsus Sweden AB orgnr.556811-8748 (the company) is the person responsible for the product .

The Swedish Medicines Agency requested in the letter "Request for samples and documents", dated 2023-10-17, that the company would send in product samples and a safety report for EVY Technology Sunscreen mousse SPF 50 as well as documentation for the sun-protective effect that the product is said to have. The documents were received by the Swedish Medicines Agency on 2023-10-27 and product samples were received on 2023-10-31.

The Swedish Medicines Agency found nothing to complain about in what was checked.

This case is part of a larger supervision project regarding sun protection products, which the Swedish Medicines Agency conducts during 2023 and 2024. The results of the supervision conducted within the project will be published in a report.

This closes this matter.

On behalf of the Swedish Medicinal Products Agency,

Nina Brunåker
